

**NOTICE OF INTENT TO ADOPT  
MITIGATED NEGATIVE DECLARATION**

Notice is hereby given that Elsinore Valley Municipal Water District has completed an Initial Study of the project described as: Alberhill Service Area Recycled Water Master Plan, which includes the communities of Alberhill and Horsethief Canyon in Riverside County, California. This Initial Study was completed in accordance with the District's Guidelines implementing the California Environmental Quality Act. This Initial Study was undertaken for the purpose of deciding whether the project may have a significant effect on the environment. On the basis of such Initial Study, the District's Staff has concluded that the project, as implemented and mitigated in accordance with the provisions identified in the Initial Study, will not have a significant effect on the environment, and has therefore prepared a Proposed Mitigated Negative Declaration. The Initial Study reflects the independent judgment of the District. The Project site is not on a list compiled pursuant to Government Code section 65962.5. Copies of the Initial Study and Proposed Mitigated Negative Declaration are on file at the District's offices, Elsinore Valley Municipal Water District, 31315 Chaney Street, Post Office Box 3000, Lake Elsinore, CA 92531-3000, and are available for public review. Any person or agency may comment upon this matter in writing. The review period during which written comments will be received begins with the date of the filing of this Notice, and ends November 13<sup>th</sup>, 2006.

At its meeting on November 27<sup>th</sup>, 2006, at 4:00 pm, the Board of Directors will consider the project and the Proposed Mitigated Negative Declaration. If the Board of Directors finds that the project as mitigated will not have a significant effect on the environment, it may adopt the Mitigated Negative Declaration. This means that the Board of Directors may proceed to consider the project without the preparation of an Environmental Impact Report.

Phil Miller, Director of Engineering
