

WESA Careers in the Water and Wastewater Industry

Why the Water Industry?

Everyone needs safe, reliable clean water to drink, so the demand for providing that service is needed world wide. Jobs will always be available in the water industry and the opportunity for new and innovative ways to get water to people...

Career Opportunities

Careers at Water Employees Service Authority (WESA) require a high school diploma. Some of the jobs offered require real world experience, while others require certification that can be obtained through local community colleges. There are many jobs that also require a four year degree and above. Depending what you enjoy, there are jobs to fit a variety of interests in the water and wastewater industry.

Do you enjoy hands-on problem solving?

Water Operations: Ever wonder how fresh clean water arrives at your tap? This team is responsible for making that happen! They oversee water production, construction, and work in the field when customers need assistance.

Wastewater Operations: Ever wonder what happens to water as it swirls down the drain? The Wastewater treatment operators and collections maintenance team work hard to clean and provide safe 'recycled' water to customers.

Maintenance: Whether it's facilities, electrical, or mechanical maintenance, our teams keep the district functioning at its peak! These teams monitor water systems, maintain mechanical machinery and ensure the buildings and grounds of EVMWD are in efficient running order.

Are you detail oriented?

Administrative: If you have superior organization skills, this might be a good fit for you! This confidential department assists in managing clerical duties for the district overall. From processing customer claims to assisting the board of directors, this department handles many functions.

WESA Careers in the Water and Wastewater Industry

Do you enjoy working with people?

Customer Service: Love talking to people? The customer service department assists our customers with their water bills and service. Our Customer Service Representatives take on many clerical duties for the District.

Human Resources: The HR team works to make the best use of employees' skills handling issues related to hiring and training, benefits, and safety within EVMWD.

Public Affairs: This team reaches out to the community to raise awareness about the triumphs and challenges surrounding EVMWD. Conservation, education and public outreach are essential parts of the public affairs department.

Do you enjoy science and technology?

Engineering : The Engineering department over sees the planning, design and construction of EVMWD's facilities and operations of the water systems.

Information Technology: The IT department supports all the computer programs that are necessary to run EVMWD. This team implements new and innovative technologies to help EVMWD run more efficiently.

Do you enjoy working with numbers?

Finance: Whether you are just out of high school or have your graduate degree, there are opportunities in the Finance Department. The finance department takes care of all money coming in and out of EVMWD and creates and maintains the budget each year to keep EVMWD on track.

Plan for your future!

Talk with your school's career advisor or talk with your local colleges about pursuing a career in water or wastewater. Certification programs are available at Mt. San Jacinto College and Palomar College.
