

CLEAN WATER EVERY DAY, FOR EVERY **1**

At **Elsinore Valley Municipal Water District (EVMWD)**, we understand the importance of having reliable access to clean, safe water and are committed to providing it to our customers' homes and businesses every day. **Since 1950, EVMWD has been supplying water to customers 24/7 – that's more than 26,485 days (or 635,648 hours) of constant, reliable service!**

Where Our Water Comes From

Locally, we live in an area with steep hillsides and rough terrain, with wide swaths of open land. This means our water and sewer must travel long distances even within our service area to accommodate our customers, adding to the costs of maintenance and operation.

With more than half of our water supplies originating from snowpack and rain hundreds of miles away, water is stored in reservoirs or ground-water basins and pumped through miles of pipelines before it reaches your faucet. It takes energy, a host of physical infrastructure and human expertise to make this journey successful.

What We Do

We invest in critical infrastructure and conduct regular maintenance and water quality testing to ensure the water that reaches your home or business is clean, safe and reliable. Working in water requires expert staff and skilled professionals. EVMWD ensures that our staff is certified and knowledgeable to ensure high-quality water service to our customers.

- EVMWD is investing **\$586 million** into local infrastructure projects that will improve water and sewer service.
- We provide more than **1,600** local jobs for our region's workforce.
- EVMWD serves **159,000** customers, including residents and businesses.

At EVMWD, we love what we do and care about the communities we serve. We recognize and appreciate our customers' efforts to use water wisely and hope they will continue well into the future. Being intentional about where and how we use water use is key to efficient and effective water service.
