## **DRINKING WATER PROBLEM CORRECTED**

Customers of Elsinore Valley Municipal Water District (EVMWD) in the El Cariso area were notified since September 11, 2024, of a problem with our drinking water due to the Airport Fire and were advised to Do Not Drink-Do Not Boil the tap water.

Our team has worked diligently to address the situation, and follow-up water quality tests performed in EVMWD's water system have confirmed that the water supply meets the State Water Resources Control Board-Division of Drinking Water's (DDW's) standards.

We are pleased to report that EVMWD's water supply is safe for human consumption; but please be advised of the following measures associated with your onsite plumbing:

- **No Fire damage to your property**: Thoroughly flush your house plumbing by running all your faucets before resuming normal use of your tap water for all household purposes, including drinking, cooking, and brushing your teeth.
- **Fire damage to your property\***: If any portions of your private property, plumbing or water service-line experienced fire damage, we advise assessment and testing of the tap-water for Benzene and volatile organic compounds (VOCs). **\*Please Notify EVMWD immediately so we may ensure the public water supply is protected from potential backflow contamination.**

We apologize for any inconvenience and thank you for your patience during and after the wildfire.

As always, you may contact Mike Ali, Water Quality Administrator, at 951-674-3146 or 31315 Chaney Street, Lake Elsinore, CA, 92530, with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
