

# LEE LAKE WELLS PROJECT UPDATE

Elsinore Valley Municipal Water District, (EVMWD) is securing our community's water supply with the Near Term Water Supply Program. The program is designed to expedite several water supply projects that will ultimately provide a local, sustainable water supply for our growing region.

The Lee Lake Wells Project involves building well facilities, installing well equipment and water treatment systems, and connecting pipelines to the Temescal Canyon transmission pipeline. Construction began in February 2024 and is anticipated to be completed in April 2025.

## Recent Progress:

- **Mechanical Building:** Roof and interior framing are underway, with coating work completed for the exterior walls and chemical laboratory rooms.
- **Chlorine and Back Wash Tanks:** Have been erected and welding is in progress.
- **Granular Activated Carbon System:** Pipe supports and steel pipe installation have begun.
- **Electrical Work:** Installation of the duct banks continues.
- **Well Heads 1 and 2:** Pipe supports and steel pipe installation are ongoing.
- **Infiltration Pond:** Excavation form setting and shotcrete are scheduled.

For questions, or to obtain additional information, call our construction hotline Monday to Friday from 8 a.m. to 5 p.m or email [LeeLake@EVMWD.net](mailto:LeeLake@EVMWD.net)

We are committed to completing the project as quickly as possible; the construction schedule is subject to change based on weather, material shortages or unforeseen circumstances. We will keep affected stakeholders updated should there be timeline adjustments. Thank you for your patience during construction as we work to enhance EVMWD's water system.
